DEPARTMENT NEWS.

PROSPECT OF THE COTTON CROP. The cotton planters report to the Department of Agriculture, in accordance with the conditional promise of their June report, an increase in the condition of the plant in every State. The percentages of average condition are higher than in June by the following figures: Three in Louisians, the Ariannas, of in Florida, 7 in South Carolina, 9 in Mississippi, 10 in Alabama, 11 in Georgia, 19 in Tennessee and Terms, and 13 in North Carolina.

This explanation has been made in simple justice to the public and the two offi-cials whose names have been so freely used by certain journals in the normalisation of the alcertain journals in the promulgation of the al-

leged differences of opinion. PASSPORTS IN FRANCE. It is officially stated that "citizens of the United States will be permitted to enter France from any direction without having their passports, but they must be prepared to prove their

nationality when required."

The foregoing notice, which has been copied nto several fournals, is calculated to lead some of our citizens into trouble. It is true, as we learn at the State Department, that for a long time passports have not seen required of strangers entering into France. They are, however, required in some of the countries of Europe and elsewhere, and the necessity alluded to in the notice, of being pre-pared to prove their nationality when required, applies to citizens of the United States equally ith all foreigners, and not only in France but in all foreign countries. A passport is the most effectual and authentic means of estab-liabing the nationality of the party named therein, and may save the bearer any amount f annoyance and detention.

of annoyance and detention.

It is therefore earnestly recommended to all
American citizens about to travel out of their
own country, to provide themselves with passports before leaving home. They are to be rocured on application at the Department of NAVAL INTELLIGENCE Secretary Robeson has complimented En-

sign T. C. Spencer for his gallant conduct upon the occasion of the capsizing of one of the Fortune's boats in the Gulf. He has also awarded a medal of honor to Boatswain's Mate Christopher Fowler for the berofam displayed by him upon the same occasion. The United States steamer Colorado, which has been under repairs at Norfolk, is ready for sea. During her detention some of her men have taken French leave. Advices have been received of the arrival of the man-of-war Con-gress at Monrovia, Liberia, ou June 5, en route to Cape Palmas. She will probably

reach Gibraltar July 18.

The steamer Dispatch, under orders to carry the Naval Committees of Congress on an inspecting tour to the several navy yards on the Atlantic coast, will leave the Washington navy Attaints coast, will leave the washington navy yard about the 4th of August. pared with July of last year the condition is higher, except in Florida, Louisians and Arbansas, though the difference is light in Tennessee and Georgia and not very wide in Mississippi and Alabams.

In the State of North Carolina the temperature has been high, the rains seasonable, and the growth rapid, though the plant is still small and ten days late in certain counties; the fields have generally had good preparation and clean culture. Edgecombe, which produces one eighth of the cotton of the State, returns a condition of one hundred and ten. The improvement has been rapid in South Carolina, and is still progressing, though the growth is not advanced to an average, and lice infest some of the fields. Darlington, yielding one seventh of the fibre of the State, returns her condition at ninety. Seventy-three counties in Georgia, representing two thirds of the crop, report a thrifty growth, a backward season, too much rain, better and cleaner tillage than last year, less fertilizers used. Rumors of the caterpillar come up from southwestern Georgia.

In the State of North Carolina the temperature has been and the growth rapid, though the state, and the processional blackmaller, in Franklin square. It is supposed that Wooster had repaired there to meet the other parties who are implicated in the matter. Improvement is manifested in Florida, with too abundant rains in some counties, and a tendency to the shedding of farms. While the rains have been frequent in Alabams, the fields have generally been kept clean. Of seven counties, which yield one third of the crop of the State, the condition is placed at minety in Bullock, Barbour, Montgomery, Margins and Russell; eighty in Hall, and one hundred in Damas. None are lower than seventy-five, or higher than one hundred and ten. The crop is late in Mississippi, but growing rapidly. It is grassy in places, yet much a cleaner than last year. The condition ranges from fifty in Temica, where it was destroyed by an overflow, to one hundred and ten in Deson after the overflow what the planting of cotton was done after the overflow until June 15, and the crop is therefore later than elsewhere, and has suffered in some places from cut worms, droughts and excessive rains. The caterpillar has appeared in Rapides. Rarely has fexas had a better promise of a fine crop. In some counties the growth is not well advanced. In a few localities plants made their appearance late in June. The stand is generally better than in other States. This sent large numbers out to the lake who at first were both to make the venture again. At 5 p. m. word came up the lake from the starting point that the water there was smoother hourly, and at 6:10 o'clock the first gun was fired at the foot of the lake, which was greeted with cheers by the immense crowd. It is minutes more a third discharge was heard. At 7:22 a fourth gun was heard, which it was thought was the signal for taking positions. From that time until 8:30 nothing was seen or heard from the starting point, which indicated that the race would take place. It then became so dark that it was evident another postponement had taken place, which was a fact. Word was brought that the race would be rowed as soon as the water was smooth enough, which was rather vague. The crowd then deliverately, and in the greatest good humor, amid singing by the collegians and others, dispersed.
